

## Repair Ointment

delivers the power of science-backed skincare to address a wide range of concerns, including irritated, cracked, rough and persistently red skin. Gentle and safe enough for newborns, yet potent enough for men and women of all ages, it's a soothing salve that works at repairing problematic patches of skin.

### Plant-Based Effectiveness

The Repair Ointment formulation includes barley seed extract, jojoba esters, saccharomyces filtrate and honeysuckle flower extracts. Each carefully researched ingredient plays an active role in addressing skin barrier issues at their source for effective repair.

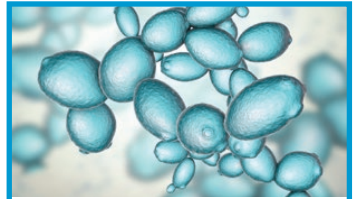

The long-chain monounsaturated fatty alcohols and fatty acids that make up **jojoba esters** are natural lubricants that hydrate, smooth and soften the skin.

The inflammation-fighting properties of **honeysuckle flower extracts** reduce redness and discomfort to soothe and calm skin.

As the base ingredient in Repair Ointment, **barley seed extract** helps inhibit the production and release of signaling molecules that promote inflammation, soothing skin and relieving discomfort with plant-based nourishment.

The active amino acids, enzymes and peptides in **saccharomyces ferment filtrate (SFF)** have a calming effect on the skin, reducing redness and irritation. As a natural humectant that retains moisture and increases hydration, SFF enhances the skin's natural barrier function for overall skin health improvements.

## Hydration Boosting, Fragrance-Free Formulation
